

To Whom It May Concern:

Jeannine Clark of Clark Interiors helped us to create the living space of our dreams. She transformed our 1970's era living room, kitchen, and bathrooms into a modern looking functional space where we absolutely love.

Her vision to open up the kitchen and living room made such a wonderful difference in our ability to entertain. The color schemes she recommended impress everyone who sees them. Gone are the drab off white walls! The custom drapes she designed are a focal point in both the living and dining rooms, full of color and function. The custom design railing she created is a melding of functionality with absolutely stunning layout.

If you ever watch a HGTV design show called "Design for the Sexes," you know how hard it is to design for two different tastes and preferences. My wife and I are like those couples in the shows. Jeannine spent a lot of time listening to my wife and me, learning what things we liked and disliked and then converting them into real world plans. The "His & Hers" bathrooms really show this off. Each of us is so pleased with the final results. Anytime there was an issue with the build out, she was always there to help make sure it came out right. Throughout the whole project, Jeannine provided above and beyond design ideas and services.

I guess we just can't say enough good things about her work. We highly recommend her to anyone who is thinking of doing a design project from small to large.
